

**TRACKER EQUIPMENT LIST .. DISCOUNTED ITEMS  
NIGHT MANEUVERS FLASHLIGHT**

Some members have written me to ask where to get the inexpensive flashlight with the red filters for night maneuvers.

It occurred to me that this group needs equipment vendors who are willing to pass on discounts to its members.

In my message on Night Maneuvers, I mentioned my military flashlight.

A Fulton Flashlight - Model N49 .. description: 3 D-Cell rough service flashlight, ABS body, 3-position switch, anti-roll switch guard, recessed ring hanger, waterproof, spare bulb and holder. Olive drab. Comes with set of blue, red, blackout and diffusion filters. NSN#6230-00-681-8570.

This is a military specification flashlight and conforms to mil. spec. MIL-F-3747 MX-994/U Type III, Style I, 3 D-Cells, Rough Service, Waterproof Light.

For maximum efficiency use BOTH RED FILTERS. However you can also use just one red filter.

Unfortunately the N49 with a standard bulb which is not good.

So I replaced the bulb with a Radio Shack Lamp Style HPR50

- \* Radio Shack
- \* Lamp style HPR50
- \* 5.20V 850mA
- \* Halogen bulb
- \* Brightness 6.76 MSCP
- \* Average life 25 hours .. If the bulb was in a 4 D-cell flashlight but this flashlight is a 3 D-cell flashlight so the lamplight is exponentially increased.

I called a supplier and arranged for members of this group to order by phone at 330-898-1475. **Just call and ask for Paul and tell him that you are a member of the Man\_Trackers\_University Yahoo Group. Paul owns an Outdoor Supplies Company and accepts credit cards.**

Paul will give you a membership discount for being a member of this group. The cost of the product will be about 55% less costly than an Inova X5 flashlight.

**I will add more equipment to the group's files as I continue to make additional arrangements from suppliers.**
